**Turn ON/OFF Sequences (for optimizing the POP performances)**

**A) USING MUTE AND STAND-BY FUNCTIONS**

**B) USING ONLY THE MUTE FUNCTION**

To simplify the application, the stand-by pin can be connected directly to Ground. During the ON/OFF transitions it is recommended to respect the following conditions.

- At the turn-on, the transition mute-play must be made when the SVR pin is higher than 2.5V
- At the turn-off, the KL7496L must be brought to mute from the play condition when the SVR pin is higher than 2.5V
